Isaac Edwards

Software Engineer

+918 889 5552 946 E 61st APT 12H, Tulsa OK 74136 isaactheedwards@email.com
Portfolio Website GitHub

Full-Stack Software Engineer with strong foundations in modern web architectures, API design, and database optimization. Experienced in building reactive front-end interfaces and high-performance backend microservices using TypeScript, React, Next.js, Node.js, and SQL/NoSQL databases.

SKILLS

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, C, SQL, HTML, CSS
- **Front-End:** React, Next.js, Express.js, Responsive Web Design
- **Back-End & Microservices:** Node.js, Flask, RESTful APIs, OAuth 2.0, Express.js
- **Databases & Caching:** PostgreSQL, MySQL, NeonDB, Redis, MongoDB
- **DevOps & Tools:** Docker, Kubernetes, Vercel, Git, GitHub Actions, GitLab CI, Bash
- **Methodologies:** TDD, Agile Development, CI/CD, Code Reviews

Technical Projects

Wurdo – Full-Stack Application | Node.js, Express, Redis, PostgreSQL, GitHub Actions

- Engineered a low-latency data and caching layer using Redis, replacing static PostgreSQL queries for heavy read operations and significantly improving lookup performance.
- Designed and deployed Node.js/Express microservices, utilizing batched cache mechanisms to minimize network overhead and database server load.
- Automated build validation and testing by implementing a Trunk-Based CI/CD workflow with GitHub Actions to maintain high stability across fast deployment cycles.

Cinema Guru – Web Application | TypeScript, Next.js, NeonDB, OAuth 2.0

- Optimized relational database queries in NeonDB by implementing targeted column indexing and pagination to boost API response times.
- Utilized connection pooling to efficiently manage active database connections and reduce server resource overhead under load.
- Developed a modular, type-safe component library using TypeScript to eliminate runtime errors and streamline UI development across views.
- Integrated NextAuth for secure OAuth 2.0 authentication, simplifying user onboarding across desktop and mobile devices.

Personal Developer Platform & Blog | React, Next.js, Node.js, Web APIs

- Built a responsive full-stack platform featuring dynamic content rendering, code-splitting, and lazy loading to maximize page performance.
- Implemented a custom blog engine with full CRUD capabilities and chunked file-upload logic to process files cleanly.
- Designed clean micro-interactions and progressive enhancement patterns to elevate overall user engagement.

EDUCATION

Computer Science Diploma – Atlas School
Google Data Analytics Professional Certificate – Coursera / Google
Google Business Intelligence Professional Certificate – Coursera / Google
